Wardrobe Spec

Design Overview - External

This is an 80mm recess at the minute. Build out as a wall continuation to the edge of the doors to give a true fitted finish. The doors could slightly slide into it.

The internals are built on 3 x PAX 768mm width = 2304mm
(68mm difference with doors listing - discuss with joiner)

Wardrobe Spec

Design Overview - Power Supply for TV (middle section)

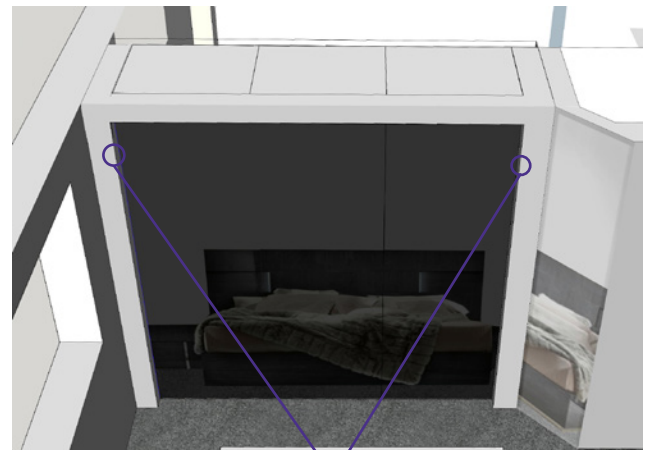

Double socket built into the middle section of the wardrobe to power TV. Joiner will need to cut hole and fix and electrician bring power to it. If the electrician is in after the joiner the joiner need to leave to make ready and leave correct cabling ready for electrician to hook up.

Design Overview - Power Supply for Internal Lighting (left and right sections)

Biard Aluminium PIR Sensor Under Cabinet Light 1000mm

Product Code: FDA00110

Power feeds for internal lights coming through new stud extension and side of left and right shell

Rather than the original bulkhead light idea we could use internal sensor activated LED strip lighting.

See the product to left for an example.

This product is 1000mm and our units are only 750mm. We could source another size or may be able to cut these down to size.
